PROFESSIONAL PROFILE

Self-taught designer, developer, and writer with 5+ years of experience building purposeful digital products — starting in 2020 with nothing but a phone and a decision to figure it out. Founder of BUILDWITHVIO, Lead Designer at Amelia Dev9, and a Statistics student at the University of Benin. Skilled across the full product lifecycle: from brand identity and UI/UX to full-stack web and mobile app development, content strategy, and community building. Faith-driven, detail-oriented, and committed to building legacy-grade work.

WORK EXPERIENCE

Lead Designer

2024 – Present

Amelia Dev9

Leading design direction for a growing development agency. Responsible for visual identity systems, UI design, client-facing deliverables, and ensuring every shipped product reflects both technical precision and aesthetic excellence.

Founder & Educator

2023 – Present

BUILDWITHVIO

Founded and operate a developer education brand for Nigerian developers without traditional access to resources. Launched cohort programs, built an AI-powered WhatsApp assistant (VIO Assistant), and grew a thought leadership presence reaching 2,100+ on LinkedIn.

Freelance Designer & Developer

2020 – Present

VIO (Personal Brand)

Delivering graphic design, website design, mobile apps, and strategic writing for clients globally. Built a full monetization stack — from digital entry kits to retainer-based engagements — operated entirely remotely.

Community Leader

2023

Campus Christ Ambassador (CCA), Uniben

Contributed to content creation, creative communication, and community building within the campus faith community, bridging spiritual depth with student life.

KEY PROJECTS

VIO Portfolio — <https://vioportfolio.name.ng>

HTML · CSS · JS · Vercel · Cloudflare

Personal brand portfolio with 10 pages, dark/light mode, SEO score 100/100, custom domain, and Google indexed in 16 hours.

Clarity Bible — <https://clarity-bible.pages.dev>

TypeScript · Firebase · Supabase · Cloudflare Pages

A personal study Bible and devotion app built solo. Features daily devotions, verse tracking, and a distraction-free reading experience.

Adun Restaurant — <https://adun-restaurant.vercel.app>

Vite · TypeScript · Node.js · Express.js · Supabase · Vercel

Full-stack web application for a restaurant covering menu display, ordering flow, and backend data management.

VIO Assistant — *Private Tool*

TypeScript · Twilio · WhatsApp API · Termux

AI-powered WhatsApp automation assistant for the BUILDWITHVIO developer education community. Built and deployed entirely from a phone.
